The Goals Database

[171x628] Increase renewable energy to 25% of total electricity use by 2025.

2018 Sustainability Report

ALDI Energy and Climate

3M

Increase renewable energy to 25% of total electricity use by 2025.

2018 Sustainability Report

ALDI, Inc.

We're always working to reduce our energy consumption and find renewable solutions.

ALDI Energy and Climate

AT&T

View Profile
2020 Goal: We will continue to drive reductions in emissions and increases in resource efficiency and alternative energy deployment.

2025 ATT Goals Overview

Our goal is to have more than 50 fulfillment centers with rooftop solar installed by 2020.

Amazon - Energy and environment

We constantly seek ways to move from depletable to renewable energy and material resources. Currently, we're evaluating new biodegradable food trays, increasing the percentage of paperboard in our boxes, and advocating locally for recycling and composting efforts.

What is Amy's Sustainability Policy?

Amy's Kitchen, Inc.

[By 2025] 100% of our purchased electricity will be from renewable sources.

Anheuser-Busch InBev - Sustainability Goals

Anheuser-Busch InBev

goal of putting 4 gigawatts of new clean energy online in our supply chain by 2020

Apple Environmental Responsibility Report 2018

Apple
Our Commitments for 2020/2025

Best Buy Co., Inc.

We are placing increased focus on securing offsite renewable energy sources and purchasing Renewable Energy Credits (RECs). Our offset target is equal to 20 percent of our 2009 baseline carbon emissions.

Best Buy Fiscal Year 2016 Corporate Responsibility & Sustainability Report

CVS Health

As part of our efforts to establish a long-term, science-based emissions reduction target, we continue to explore ways to increase renewable energy opportunities.

CVS Health 2017 Corporate Social Responsibility Report

Campbell Soup Company

Our supporting 2020 goals, which track back to a FY2008 baseline, keep us continually focused on building sustainable business models. They include:
- Reducing energy use by 35 percent and sourcing 40 percent of our electricity from renewable or alternative energy sources

Campbell's 2017 Corporate Social Responsibility Report

Church & Dwight Co., Inc.

In 2017, we established new environmental goals with respect to greenhouse gas (GHG) emissions, water reductions and solid waste recycling. Our GHG goal is to be carbon neutral by the end of 2025.
- Reduce – our overall consumption of energy from our operations and transportation.
- Recycle – continue the successful recycling efforts at all operations.
- Renew – support the generation of clean green energy.

Church & Dwight Co., Inc. 2017 Sustainability Report

Use electricity generated from renewable sources for at least 85% of our global electricity by 2022.

Cisco 2017 Corporate Social Responsibility Report

Our climate and energy goals are to source 100% green power for Clif Bar owned and operated facilities and offset our annual carbon footprint by supporting projects that generate social and environmental benefits. In addition, we are working to reduce carbon intensity to 10% below a 2014 baseline by 2020 as well as working with supply chain partners to transition to at least 50% green power for electricity used for Clif Bar products and services by 2020.

Clif Bar & Company - Sustaining the Planet

We will promote use of renewable energy and reduce absolute greenhouse gas emissions from manufacturing by 25% compared to 2002 [by 2020].

Colgate Corporate Social Responsibility and Sustainability Report 2017

We're working toward zero emissions, zero waste, and 100% renewable energy.

Comcast Corporation
Throughout 2016, we continued to sharpen our focus in three core areas: lowering the amount of energy used by our products and facilities, reducing greenhouse gas emissions from our nationwide vehicle fleet, and minimizing the amount of waste we send to landfills.

**Sustainable Excellence From the Ground Up**

**Danone North America**

100% renewable electricity by 2030; 50% by 2020.

**Danone 2017 Annual Report**

**Dell**

We are setting a target of sourcing 50 percent of our electricity needs from renewables (purchased or generated on-site) by 2020.

**Dell 2020 Legacy of Good Plan**

**Estée Lauder Companies, The**

Building on several years of working to reduce both emissions intensity and absolute emissions from our owned and operated facilities, we set a new long-term goal in fiscal 2016: net-zero emissions by 2020. We plan to meet our goal by continuing to apply our strategy of improving efficiency in our operations, investing in clean and renewable energy and purchasing carbon offsets, where necessary.

We further enhanced our corporate commitment to clean energy by joining RE100 and committing to sourcing 100% of our global electricity from renewable energy technologies by 2020.

**Estée 2016 Progress on Sustainability and Citizenship Report**

**Estée 2017 Progress on Sustainability and Citizenship Report**

**FedEx**

Goal: Expand on-site energy generation and continue to procure renewable energy for facilities.
Ford Motor Company

We are working to meet more of our energy needs from renewable sources to reduce our reliance on fossil fuels and address climate change.

Ford Motor - Sustainability Report 2017/2018

Frontier Co-op

We are committed to reducing our energy consumption levels and using only green energy. We offset 100% of our electrical power usage through the purchase of Green-e certified Renewable Energy Credits. We also offset carbon generated from our shipping, making us one of the first distribution centers to provide 100% carbon neutral shipping.

Frontier Co-Op Sustainability

General Motors

2020 Operational Commitment: Increase renewable energy to 125 MW

Renewable energy generation is increasing at an aggressive pace as we work toward a new goal to meet 100 percent of the electrical needs of our global operations through renewable energy by 2050.

General Motors 2017 Sustainability Report

Grove Collaborative

We purchase credits to fund projects that reduce pollution such as wind farms, solar installations, or energy efficiency retrofits in order to counteract our shipping emissions.

Grove Collaborative FAQ
In 2016, we committed to sourcing 50% renewable energy for our operations by 2025 – with a long-term goal to achieve 100%.

Source: Hewlett Packard Enterprises Living Progress Report 2017

Hewlett-Packard Company (HP)

Use 100% renewable electricity in our global operations, with a goal of 40% by 2020.

HP 2017 Sustainable Impact Report

Home Depot

135 MW of energy produced annually through renewable and alternative energy [by 2020].

Home Depot Performance Page

IBM

procure 20 percent of its electricity consumption generated from renewable sources by 2020, over and above the quantity of renewable electricity provided as part of the mix of electricity that we purchase from the grid.

IBM 2017 Corporate Sustainability Report

IKEA

By August 2020, the IKEA Group will produce as much renewable energy as we consume in our...
Grow the installation and use of on-site alternative energy to three times our 2015 levels by 2020.

Continue 100% green power in our U.S. operations and increase alternative energy use for our international operations from 2015 to 2020.

**Intel 2016 Corporate Responsibility Report**

Johnson & Johnson

Produce/procure 35% of electricity from renewable sources by 2020; aspire to power all facilities with renewable energy by 2050.

**J&J Energy Use & Carbon Emissions**

By 2020, expand the use of low-carbon energy in our plants by 50% from a 2015 baseline.

By 2050, source 100% renewable electricity.

**Kelloggs's 2017/2018 Corporate Responsibility Report**

Kimberly-Clark Corporation

Create a step change reduction in greenhouse gas emissions and energy cost by switching to lower carbon emitting fuels (e.g., gas, biomass, and renewable energy).
LG Electronics
Contribute to creating a sustainable society through continuous development of environmentally friendly businesses such as renewable energy and EVs

LG 2016-2017 Sustainability Report

Lowe's
Lowe's is improving our environmental performance and creating a healthier world through the purchase of green power — electricity generated from renewable energy sources, such as solar and wind power.

Lowe's Buying Green Power from Renewable Energy Sources

Mars, Incorporated
By the end of 2018, we'll expand our purchase of renewable electricity to cover demand from all our direct operations in 10 countries.

Mars - Sustainable in a Generation Plan

McDonald's
We support a shared mission to increase access to cost-competitive renewable energy across the McDonald's US system. In 2014, the McDonald's company-owned restaurants and franchisees in Europe purchased 76% of their electricity from renewable sources across 21 markets, 10 of which have achieved or are working toward purchasing 100% renewable electricity. McDonald's U.K. has committed for a 20-year period to purchase renewable energy directly from new infrastructure.

White House American Business Act on Climate Pledge
Microsoft

Our goal is using more clean energy to power our datacenters and operations every year, with a goal of topping 60 percent early in the next decade.

Microsoft - Transitioning to zero-carbon energy

Nestlé USA

Ongoing: As a member of RE100, aim to procure 100% of our electricity from renewable sources within the shortest practical timescale.

Nestle Climate Change

Nike Inc.

Reach 100 percent renewable energy in owned or operated facilities by the end of FY25 and encourage broader adoption, as part of our effort to control absolute emissions.

Nike, Inc. FY16/17 Sustainable Business Report

PVH Corp.

We are exploring renewable energy options such as on-site solar panels, off-site power purchase agreements and procuring renewable energy credits. Our strategic approach is to first increase the energy efficiency of our own operations, and then proceed with the procuring of renewable energy.

PVH 2017 Corporate Responsibility Report

PepsiCo
As part of our goal to reduce our absolute greenhouse gas (GHG) emissions by 20 percent by 2030, PepsiCo is increasingly shifting towards renewable energy.

PepsiCo Renewable Energy

Source 30% of our total energy, both thermal and electric, from renewable sources by 2020

P&G 2018 Citizenship Report

We are committed to sourcing 100% renewable electricity by 2030 and have recently signed up to RE100.

RB Detailed Sustainability Report 2017

We are committed to operating in an environmentally responsible manner. That means taking a look at our operations and finding where we can lessen our impact by reducing global manufacturing waste and greenhouse gas emissions, and increasing our use of global energy from renewable sources.

SC Johnson 2017 Sustainability Report

All energy from non-fossil sources [by 2020] (Seventh Generation facilities, travel, commuting, Third Party Manufacturers and distribution)

Seventh Generation Corporate Consciousness Report 2017
Maximize energy efficiency and renewable energy use

2015 Corporate Responsibility Report

Starbucks Coffee Company

Invest in 100% Renewable Energy to Power Operations Globally by 2020

2016 Global Social Impact Performance

TJX

Renewable energy is an increasingly important part of our environmental sustainability strategy and our approach to reducing GHG emissions from electricity consumption.

TJX Sustainable Packaging Recommendations

Target

We're committing to sourcing 100% renewable energy in our domestic operations, which we will work with partners to achieve in the coming years.

Add solar rooftop panels to 500 of our stores and distribution centers by 2020.

Target 2018 Corporate Social Responsibility Report

Tyson Foods, Inc.

We strive to use renewable fuels like biogas from our wastewater treatment operations, whenever possible, and to reduce our greenhouse gas emissions by making efficient use of energy.
We are accelerating our investments across our fleet and facilities, aiming for 25 percent of our total electricity to come from renewable sources by 2025.

By 2025, alternative fuels will supply 40 percent of our total ground fuel needs. All of these initiatives will drive UPS toward our vision of a zero-emissions future.

We have committed that, by 2020, 25 percent of our annual vehicle purchases will be alternative fuel or advanced technology vehicles. UPS will remain the industry leader in seeking alternative fuel opportunities for our worldwide fleet.

UPS 2016 Corporate Sustainability Report

In 2015, we set ourselves the ambition of becoming carbon positive by 2030. By becoming carbon positive, we will:
- Source all our electricity purchased from the grid from renewable sources by 2020
- Source 100% of our energy across all our operations from renewable sources by 2030
- Eliminate coal from our energy mix by 2020
- Directly support the generation of more renewable energy than we consume, making the surplus available to the markets and communities where we operate by 2030.

Unilever - How we're becoming carbon positive in our operations

We've set a goal to add an additional 24MW of green energy in our operations by 2025.

Verizon 2017 Corporate Responsibility Report
Drive the production or procurement of 7 billion kilowatt hours (kWh) of renewable energy globally by Dec. 31, 2020—an increase of more than 600 percent versus our 2010 baseline.

Double the number of on-site solar energy projects at our U.S. stores, Sam's Club locations and distribution centers by 2020, compared with our 2013 baseline. That's more than 480 sites by 2020.

Walmart 2017 Global Responsibility Report

World Centric

We also believe in investing in renewable energy like solar and wind energy production in addition to carbon offsetting programs such as planting trees.

World Centric - Caron Offsets
