

Safe'n'Sound

A HEALTHIER AFFORDABLE BUILDING PRODUCT

Safe'n'Sound is a batt insulation made from mineral wool that provides excellent acoustic dampening and is non-combustible. It is especially well suited to use in interior walls and ceilings between walls. Safe'n'Sound is Greenguard Gold Certified, meaning it meets strict requirements for VOC and formaldehyde emissions.

*NOTE: This product contains phenol formaldehyde. According to the manufacturer: "Phenol formaldehyde is allowed in rigid mineral wool insulation for exterior applications (such as rain screen assemblies or foundation insulation). While rigid mineral wool insulation does contain some formaldehyde, most of the formaldehyde is eliminated in the production process through a chemical reaction and high heat. Rigid mineral wool insulation installed on the exterior of the building possess less risk to humans and ecosystem than rigid foam insulation products, which almost always contain HFRs and use blowing agents with high global warming potential."

CATEGORY **MANUFACTURER**
Insulation, Mineral Fiber **Roxul**

MATERIAL COMPOSITION *

Mineral Fiber 94-99%, Cured Urea Extended Phenolic Formaldehyde Binder 1-6%
**As reported by manufacturer and product SDS*

AVAILABLE SIZING

Available in a variety of sizes and thicknesses for wood and metal framing

COLORS

Taupe
