

Seaweed Insulation

AVAILABLE AT THE DONGHIA MATERIALS LIBRARY

Seaweed insulation provides an organic alternative to materials such as mineral wool. Seaweed mats are formed using heat and high-pressure compression. It allows for a long lifetime and for repeated recycling, either reused as insulation or transformed into 2D or 3D designs. Advance Nonwoven's Seaweed Insulation is Cradle to Cradle Gold Certified. Their standard product contains no added flame retardants or antimicrobials. However, because these additives are available upon request, it is best to emphasize a desire for no added treatments when ordering the material.

CATEGORY **MANUFACTURER**
Insulation, Seaweed **Advance Nonwoven**

MATERIAL COMPOSITION

90% seaweed, 10% recycled fiber

AVAILABLE SIZING

Thickness 10-250 mm, width 1200 mm max, length is unlimited

COUNTRY OF MANUFACTURE

RAW MATERIALS ORIGIN

CERTIFICATIONS & DISCLOSURES

- Health Product Declaration (HPD)
- Declare Label
- Environmental Product Declaration (EPD)
